

CONLOGIC

Efficient Warehouse and Production Management

The ConLogic Scanner solution is a user-friendly Fiori app for warehouse and production staff in Stock Room Management. It enables seamless inventory management, supports inventory counting, and facilitates production supply directly at the workplace.

With an intuitive interface and real-time data synchronization, this app reduces manual errors and ensures smooth warehouse and production processes.

Whether picking items, supplying the production line, or conducting inventory counts, ConLogic optimizes each step. Fully integrated with SAP S/4HANA, it enhances inventory visibility and control, leading to better decisions and increased efficiency.

A POWERFUL TOOL FOR INVENTORY MANAGEMENT, PRODUCTION SUPPLY AND MORE

Optimize your warehouse and production processes with our Fiori App

Key benefits

- Efficient picking: Quick and error free collection of stock for shipping or production
- Optimized production supply: Direct and reliable supply of materials to production orders
- Easy inventory counting: Simplification of inventory processes through intuitive operation.
- Flexible stock management: Simple stock transfer directly on-site

Features

- Picking: Capture and manage inventory for shipping or production
- Production Supply: Allocation and provision of materials for production orders
- Inventory counting: Perform inventory counts with real-time inventory updates
- Stock transfers: Flexible stock transfers between different storage locations

Technical details

- Technology: SAP Fiori-based, fully integrated with SAP S/4HANA
- System Requirements: Requires SAP Fiori Front-End Server and backend system with appropriate configuration

Benefits for your company

- Time savings: Reduces the time required for picking and inventory counting
- Error reduction: Minimizes errors through automated processes and real-time data
- Improved inventory accuracy: Real-time data ensures up-to-date inventory information at all times
- Increased productivity: Simplified workflows and intuitive operation ease the workload of your employees

Success Story

„Since implementing ConLogic we have reduced our picking times by 30% and significantly improved our production supply efficiency.“

Industry: Machinery and plant engineering

Your partner for transformation

Convista is one of the leading consultancies for transformation. The consultancy supports its clients in the conceptualization and implementation of new business processes and designs end to end solutions for SAP and IT projects. Together with its clients, Convista masters complex challenges by pooling its expertise and many years of industry and technology experience.

For more than 20 years, Convista has been supporting customers from the insurance, industry, healthcare and energy sectors with SAP and IT projects – for an increasingly digitalized world.

Convista is headquartered in Cologne and employs over 1000 people over the world.
